Summary

Computer Science undergraduate focused on AI/ML, Data Science, and Business Analytics, with hands-on experience building predictive models and data-driven applications using real-world datasets. Experienced in machine learning and deep learning, financial forecasting, sentiment analysis, data visualization, and business intelligence, with proficiency in Python, SQL, and Power BI. Skilled at transforming complex data into meaningful insights and practical solutions for real-world business challenges.

Projects

Intelligent URL Threat Analyzer| *Python, Streamlit, Mongodb, Scikit-learn, ML, HuggingFace | GitHub Link* **Sep 2026 – Nov 2026**

- Developed an interactive phishing analysis application using **Streamlit** on the PhreshPhish dataset, classifying **URLs** as benign or phish with confidence scores and feature-level evidence.
- Implemented a **53-feature representation** from URL and HTML attributes and evaluated **6 classical machine learning models** using accuracy, F1-score, ROC-AUC, and PR-AUC on a stratified train–test split.
- Integrated **streaming data ingestion** into **MongoDB** for labelled records and prediction history, along with interactive views for analysis, dataset exploration, and model performance.

Stock Market Analysis | *Python, Machine Learning, Deep Learning, Streanlit, Yahoo Finance | GitHub Link* **Oct 2025 – Dec 2025**

- Built an interactive **stock market analytics dashboard** using Streamlit and Yahoo Finance, analysing historical market trends across US, UK, European, and Australian stocks through technical indicators and dynamic financial visualisations.
- Leveraged **9 forecasting approaches**, including Random Forest, Extra Trees, HistGradientBoosting, XGBoost, LightGBM, LSTM, GRU, and naive baselines, with chronological validation and comparative evaluation using MAE, RMSE, and Directional Accuracy.
- Performed **financial feature engineering** using historical returns, moving averages, volatility, momentum, and trading volume indicators to support configurable 1-, 3-, and 5-day return **forecasting and model performance analysis**.

Certificates

Oracle AI Database Certified Foundations Associate **Oct 2026**

Oracle platform — Certificate Link

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate **May 2026**

Oracle platform — Certificate Link

Oracle Data Platform 2025 Certified Foundations Associate **Apr 2026**

Oracle platform — Certificate Link

Achievements

- Achieved a **Top 1% global rank** of **126 out of 47,923** in **GirlScript Summer of Code (GSSoC) 2026**, **with 84 PRs** merged across **22 open-source projects**. | *Certificate*
- Demonstrated competitive programming excellence with **1,400+ LeetCode problems solved**, 30+ **badges**, **500+ day streak**, and **Global Rank 8394.**
- Achieved **5 stars ratings** in Problem Solving, SQL, Python, Java, and C++**,** reflecting **strong programming expertise** on **HackerRank.**

Technical Skills

Languages: C/C++, Java, Python, SQL
Data Science & ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, SHAP
Data Visualization: Power BI, Matplotlib, Seaborn, Plotly, Streamlit
Databases: MySQL, PostgreSQL, MongoDB
Big Data & Tools: Apache Spark, PySpark, Hadoop, Hive, Kafka, Git, GitHub, Postman, Jupyter, n8n

Education

Lovely Professional University **2023 – Present**
Computer Science and Engineering — CGPA: 7.96 *Phagwara, Punjab*

Innocent Hearts School, Gmt Punjab **2022 – 2023**
12th with Science — Percentage: 90 *Jalandhar, Punjab*

Cambridge International School for Girls, Punjab **2020 – 2021**
10th — Percentage: 95 *Jalandhar, Punjab*
